DETAILED ACTION

This is an Allowance for application no. 09/810,154 in response to the amendment filed on 19 January 2005 where in claims 1-21 are presented for examination.

Allowable Subject Matter

Claims 1-21 are allowed.

The following is an examiner's statement of reasons for allowance:

After a further search and a thorough examination of the present application, claims 1-21 are found to be in condition for allowance. The closest prior art (Hanamura et al. US Patent no. 6,587,508) discloses a similar method for compressing a group of basic media data units as shown in Figure 1. Hanamura fails to particularly teach or suggest "determining whether to reduce the size of the basic media unit in view of a predefined relationship between a predefined compressing ratio (PCRA) and a residual ratio (RR); reducing the size of the basic media data unit, in view of the determination, by changing the values of at least some of the amplitudes; and partially encoding the basic media data unit" as claimed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

US Patent 6,763,067 to Hurst.

US Patent 6,526,099 to Christopoulos et al.
